DRONERESPONDERS

Mission

To facilitate the awareness, education, training, and use of drones for good by public safety and emergency services personnel.

About

DRONERESPONDERS is a 501(c)(3) non-profit program administered via AIRT, Inc. to provide charitable support, education, and testing of UAS for public safety and emergency management to serve the general public. Visit us at droneresponders.org

DRONERESPONDERS

TAP Overview

The DRONERESPONDERS Technical Advisors Program (TAP) seeks qualified, committed and engaged leaders capable of serving as volunteer subject matter experts (SME's) within the various areas of public safety UAS operations.

DRONERESPONDERS Technical Advisors (TA's) are masters in specialties such as HAZMAT, Search and Rescue, and SWAT operations with UAS. TA's serve as our primary SME's for education, forum discussions, blog posts, media outreach, speaking engagements, and training. In short, they are our DRONERESPONDERS rock stars!

This position is not for the feint of heart. TA's must be willing to roll up their sleeves and volunteer their time and expertise to help their public safety brothers and sisters master the art and science behind successful public safety UAS operations.

You'll accomplish this through writing blog posts, facilitating forum discussions, participating in interviews with national media reporters, and appearing at DRONERESPONDERS events.

If you believe you can provide what we need as a DRONERESPONDERS TA, then we want to hear from you!
